The screenshot shows a Zoom meeting in progress. The main window displays a PowerPoint slide with the following content:

EWB Night . Live online!

6 August 2022

1. Welcome new comers
2. News & activities update
3. Sharing Talk
 - Urban biodiver"city" + urban yard waste
 - 城市生物多样性 + 城市庭院垃圾
4. Salon
5. {Post-event Chats}

The Zoom interface includes a top bar with the date '日期 下午 8:24 8月6日 周六', a toolbar with icons for chat, mute, video, and screen sharing, and a bottom bar showing the names of participants in a grid.

A grid of Zoom video thumbnails showing various participants in the meeting. The thumbnails are arranged in a 4x3 grid. The participants shown are:

- Edward Chan
- Alan Yip
- Ray Lopinski - HK
- George Cheng
- Caroline Law
- E Yiu
- Gloria Ip
- Rays iPad Pro 1706
- Melody Wong - Arup Sus
- Tiffany Fung
- EWB HK
- Samantha

Some thumbnails are blank, indicating that the participants have their video off. A logo for EWB HK is visible in the bottom right corner of the grid.

EWB HK Summer Gathering

25 August 2022

Bi-monthly Global EWBHK Get Together gathering

4 Sept 2022

Global Engineers Without Borders Movement

Our potential

Coordinated international movement directed towards significant global impact, offering:

- A strong, unified global voice
- Globally coordinated, high impact programming
- Mobilisation of upskilled engineers around the world

Consultation of EWB- International Strategic Workshop

25 August 2022

Engineers Without Borders International is seeking to maximize our global impact through understanding and supporting Regional / National EWB Organizations. There have been Strategic Workshop Sessions and now we want to hear from you.

Shaping the future of the global Engineers Without Borders movement

Engineers Without Borders International is committed to facilitating meaningful engagement across the global network over the coming months so that together we can identify common purpose and common strategy to deliver greater benefit to the world.

As a representative of a national Engineers Without Borders organisation, your feedback on the emerging themes from this strategic discovery process is vital.

This is the first survey to collect your feedback. It has been built from the insights shared by leaders from 23 Engineers Without Borders organisations across the world during the first strategic discovery workshops delivered in June.

Some questions are preceded with '*if you have time*'. These questions ask for your deeper insights and may take more time to respond to, so whilst we'd love your responses on every question, if you are short on time please feel free to skip these ones. You can also save your responses and return to them at a later time by clicking the 'save' button at the bottom of the form.

Jotform

Now create your own Jotform - It's free!

Create your own Jotform

across your organisation.

We encourage completion of the survey by Wednesday 31 August to help us keep moving forwards.

Thank you for your time to provide your thoughts. We're excited to be co-creating our collective future with you.

The opportunity of coming together

What are your thoughts on the opportunities that open up by better coordinating the global EWB movement and enabling greater collaboration in our network.

How do you rate the following opportunities that are available to us by working together: *

	Not a priority	Low priority	Medium priority	Essential
We can establish and uphold common standards of practice to protect our name and reputation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
We can build global programmes that deliver global impact	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can mobilise volunteers from all over the world to support our work	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can improve our efficacy by sharing resources and tools	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can establish partnerships with other global NGOs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can share and learn from each other to continuously improve our work	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can build a shared voice that can be a powerful influencer of change	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can transfer suitable existing programmes to new geographies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
We can access global funding opportunities and disseminate funds equitably	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
We can promote a global brand to generate public recognition and support	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
We can develop best practice guidance that we can share with the world	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Consultation of EWB- International Strategic Workshop

25 August 2022

Consultation of EWB- International Strategic Workshop

25 August 2022

Use this space to suggest other priority opportunities that open up from working together as a global movement that not presented above.

- Influence at University level
- Be influencer on key issues..Intl summits, COP26

If you have time. Please explain why you have selected the highest priority opportunities, and / or why you have identified opportunities as low priority / not a priority from this list.

- With a shared voice we can have a bigger influence and power of collective actions.
- Technical solutions need to be context base so 'best practice' could be difficult
- Our brand will grow by focusing in on other priorities (by our works)
- Global funding is complex (national security, taxation issues)
- We can have a bigger wider impact by partnering with other NGO's, especially to look after the logistics involved in each project

Consultation of EWB- International Strategic Workshop

25 August 2022

Ten years from now...

During the workshop we invited participants to imagine what the global Engineers Without Borders movement could achieve ten years from now if we united and worked together to deliver significant global impact. The following questions ask for your feedback on the outputs of the workshop discussion as well as providing space for you to add your own thoughts.

What should we focus on?

Which of the following focus areas do you think have the greatest potential for us to work together on so that we can deliver significant impact and benefit to the world over the next ten years? You can select up to four areas and / or suggest alternatives below. We note that there are overlaps. *

- Increasing diversity in engineering
- Addressing water access issues
- Addressing sanitation and hygiene issues
- Supporting underserved communities and vulnerable populations with engineering services
- Addressing food access issues
- Preparing communities for climate change
- Addressing energy access issues
- Investing in entrepreneurs who focus on social and environmental injustices
- Embedding our approach into engineering education
- Reshaping engineering practice in engineering companies
- Youth STEM outreach
- Supporting governments to deliver better engineering infrastructure

What are our strengths?

The following were identified as strengths (existing and potential) of the global Engineers Without Borders movement. These strengths are what make us unique and what we can offer to the world that no one else is capable of. Which of the following do you think are our unique strengths? You can select up to three. *

- We mobilise a significant number of volunteers around the world
- Our community is large and representative of diverse voices from all over the world
- We are effective at tackling social and environmental injustice
- We are experts in technologies and engineering that best serve marginalised communities
- We can better inspire and prepare the next generations of engineers than anyone else
- Our community is hugely passionate about making a positive difference
- We leverage engineering skills and expertise
- We can influence the wider engineering community, which has a significant role in addressing global challenges
- We know how engineering will support the delivery of the Sustainable Development Goals and are best placed to advise governments, major investors and international institutions (e.g. the UN)
- Through mobilising volunteers we can deliver support to people that otherwise can't access engineering skills and expertise

Use this space to suggest other strengths you believe are unique to us that are not included above. Please keep to a maximum of three in total (including any you've selected above).

Type here...

If you have time. Use this space to expand on your response. Explain how these are strengths of the global Engineers Without Borders movement and what it means we can do that no one else / very few can. If you think there are strengths we should invest in developing, use this space to explain why and suggest how.

-Our strengths are almost self evident but the issue is "how we utilize them for Maximum impact. We can have a bigger impact by working together with a stronger global voice

Consultation of EWB- International Strategic Workshop

25 August 2022

Consultation of EWB- International Strategic Workshop

25 August 2022

If you have time. Tell us why you think these focus areas are important for the global Engineers Without Borders movement. What statistics or other evidence would you use to support prioritising these focus areas and help us explain our focus to external audiences? If you can, please tell us what this looks like at a global level, and from the perspective of the country / region you operate in.

- Preparing for Climate Change encompasses addressing water, food and sanitation access issues.
- Any support we can give to underserved communities is always helpful
- Influencing engineering education helps us impact the future to minimize negative impacts
- Adding a voice and support for social and environmental injustices is critical in living our values

If you have time. For these focus areas, what impact story/stories and/or impact metrics would you like to see us celebrating ten years from now that demonstrate our achievements in this area? If you can, please tell us what this looks like at a global level, and from the perspective of the country / region you operate in.

Type here...

What scenarios can you foresee that you would like the global Engineers Without Borders movement to consider engaging in?

- Global Climate Change Discussions
(Make public statements on COP26, Davos, Regional/National Summits)
(Have a presence at Industrial Conf and Summits to promote Sustainability)"
- Consumerism and Circular Economy, Packaging
(This is a major root cause of pollution and waste)"
- Societal Education on Sustainability
(Use our global reach and expertise for public awareness and education)"

That's it! Take a moment to read back through your responses before you submit and thank you for participating in this questionnaire.

Shamshuipo Kaifong Welfare Association Primary School

深水埔街坊會小學校

It is a full-time co-educational primary school located in Yu Chau Street, Sham Shui Po, Kowloon, Hong Kong. It was established in 1964 by the Sham Shui Po Neighborhood Welfare Promotion Association. The school currently adopts Chinese teaching, and its school building covers an area of 1,000m².

The school has a total of 12 standard classrooms, assembly hall, a school office, a counseling room, a library, a music room, a computer teaching room, a medical room, a teaching resource room, a sports room, a group activity room, a canteen and multiple storage room.
